

Thank you for praying

- For Ann's care team and surgeons, including **Drs. Espinosa**, and **Friedman**, the nurses, anesthesiologists, and others
- That Ann Teget and her family and friends would approach the procedure day (July 22) with a sense of **peace and calm**
- For Ann's **veins to stand out** so the IVs start on the first try (this is almost always a tricky one)
- That all of the **goals of the surgery will be met** in a way that is **easier than anticipated**
- That the laser would pass through Ann's blood vessels **smoothly** and that it would cut **precisely**
- For Ann's daughter, **Meghan**, and husband, **Steve**, as they wait during the procedure; that they would be filled with patience, calm, and certain knowledge that God is in control
- That the outcome of the surgery would exceed all expectations; that the tricuspid valve would **return to normal function**
- That recovery and healing would be **quick** and reasonably pain-free
- That in all of this **God would be glorified** and His works and faithfulness would be seen and known
